

Senior Scientist, Discovery & Translational Pharmacology

Job ID
REQ-10010839
Aug 27, 2024
USA

Summary

Disease Area X, a department within the Biomedical Research (BR) group of Novartis, focuses on diseases of critical human organs, including kidney, liver and multi-organ fibrosis. We are seeking a scientist to join our interdisciplinary pharmacology team (Discovery and Translational Pharmacology) to contribute to our mission in delivering transformative new therapies for patients with an emphasis on fibrotic disorders. In this role, you will work independently to leverage complex *in vivo* model systems to advance innovative therapeutic agents for the treatment of these diseases.

About the Role

Internal Job Title: Senior Scientist I/Senior Scientist II

Location: On-site, Cambridge, MA

About the role:

Disease Area X, a department within the Biomedical Research (BR) group of Novartis, focuses on diseases of critical human organs, including kidney, liver and multi-organ fibrosis. We are seeking a scientist to join our interdisciplinary pharmacology team (Discovery and Translational Pharmacology) to contribute to our mission in delivering transformative new therapies for patients with an emphasis on fibrotic disorders. In this role, you will work independently to leverage complex *in vivo* model systems to advance innovative therapeutic agents for the treatment of these diseases.

Key Responsibilities:

- Conducting experiments with animal models of fibrosis and other diseases of interest to DAX: administering candidate therapeutics to experimental animals, making clinical/*in-life* observations, and harvesting samples for the evaluation of drug levels, histology, and molecular endpoints.
- Independently design, execute and analyze experiments, interpret data from different sources, draw relevant conclusions, and document and present data, in line with project needs and timelines.
- Develop and validate novel *in vivo* models and readouts for fibrotic disorders.
- Independently implement and analyze *ex-vivo* bio-analysis on generated samples.
- Collaborate with multidisciplinary teams across Disease Area X

- Conduct activities in compliance with all institutional and regulatory protocols, policies, and guidelines and with Novartis Values & Behaviors.

Essential Requirements:

- BS or MS in Biomedical Sciences or equivalent and a minimum of 4 years related post-graduate laboratory experience in an academic or industrial drug discovery setting in an in vivo role.
- Knowledge and hands-on experience with in vivo rodent research with proficiency in procedures including multiple dose routes of administration, blood/tissue collection and necropsies.
- Experience with biochemical assays (e.g. ELISA, qPCR, Western blotting etc.) and/or other ex vivo assays, plus in vivo/ex-vivo imaging.
- Strong ability to multi-task and adapt to new procedures and projects.
- Has curiosity and is able to identify complex problems and provide innovative solutions.
- Strong organizational skills, self-motivation, attention to detail, flexibility, proactive willingness and desire to engage in the laboratory workflow.
- Team oriented and collaborative work ethic.
- Self-awareness and desire to develop your skills further.

Desirable Requirement:

- Experience with rodent models of fibrosis.
- Experience in developing complex, disease-relevant in vivo models.

Why Novartis: Our purpose is to reimagine medicine to improve and extend people's lives and our vision is to become the most valued and trusted medicines company in the world. How can we achieve this? With our people. It is our associates that drive us each day to reach our ambitions. Be a part of this mission and join us! Learn more here: <https://www.novartis.com/about/strategy/people-and-culture>

You'll receive: You can find everything you need to know about our benefits and rewards in the Novartis Life Handbook: <https://www.novartis.com/careers/benefits-rewards>

Commitment to Diversity and Inclusion / EEO: The Novartis Group of Companies are Equal Opportunity Employers and take pride in maintaining a diverse environment. We do not discriminate in recruitment, hiring, training, promotion or other employment practices for reasons of race, color, religion, gender, national origin, age, sexual orientation, gender identity or expression, marital or veteran status, disability, or any other legally protected status. We are committed to building diverse teams, representative of the patients and communities we serve, and we strive to create an inclusive workplace that cultivates bold innovation through collaboration and empowers our people to unleash their full potential.

Novartis Compensation and Benefit Summary: The pay range for this position at commencement of employment is expected to be between \$92,800 to \$153,600/year; however, while salary ranges are effective from 1/1/24 through 12/31/24, fluctuations in the job market may necessitate adjustments to pay ranges during this period. Further, final pay determinations will depend on various factors, including, but not limited to

geographical location, experience level, knowledge, skills, and abilities. The total compensation package for this position may also include other elements, including a sign-on bonus, restricted stock units, and discretionary awards in addition to a full range of medical, financial, and/or other benefits (including 401(k) eligibility and various paid time off benefits, such as vacation, sick time, and parental leave), dependent on the position offered. Details of participation in these benefit plans will be provided if an employee receives an offer of employment. If hired, employee will be in an “at-will position” and the Company reserves the right to modify base salary (as well as any other discretionary payment or compensation program) at any time, including for reasons related to individual performance, Company or individual department/team performance, and market factors.
